04 | Databases and Scrapping

Ivan Corneillet

Data Scientist

# Learning Objectives

After this lesson, you should be able to:

- Access SQL databases from *pandas*

- Describe how web scraping works conceptually and explain practically how to web scraping works using Python

Relational Database Management Systems (RDBMS)
# and
Structured Query Language (SQL)

A relational database links data entities and concepts. E.g., a relational data model for entries on a social news site
